[AMDA Nepal Medical Relief #5: Rasuwa- Bhote Koshi Flood in Nepal]

According to the previous Camp Days, the AMDA Nepal medical relief team-initiated Day 4 operations at 9:00 AM at Bogitar Community Health Unit, Uttargaya Rural Municipality, providing outpatient health consultations and pharmaceutical dispensing to 29 local people with acute and chronic conditions. Dr. Shikhar Kattel and Mr. Pradip Shrestha visited the temporary office of Uttargaya Rural Municipality (the original municipal office was destroyed by flash floods) for a strategic health assessment meeting with Health In-charge

During the assessment meeting, it was noted that Uttargaya Rural Municipality comprises five wards with a total population of 8,555 and five listed health facilities, including two community health units, none of which suffered major structural damage.

However, verified figures for the total flood-affected population and its demographic distribution remain unavailable. Although no active disease outbreaks or urgent health-facility infrastructure interventions were reported at the time of assessment, the disruption of routine healthcare services, the absence of a sanctioned Medical Officer post in the municipality, and limited laboratory diagnostic services remain critical considerations
